# Wolfman Overland Duffel

by Bill Dragoo

Overlanding spans all forms of transport, from dual-sport moto to self-contained *Earth Roamer*. Overlanding luggage must adapt or die. For 2016, *Wolfman Luggage* has designed the *Overland Duffel* to leap over the border between travel modes. This 1680-Denier ballistic vinyl, 45-liter capacity system stuffs into an airline overhead storage bin as easily as it straps to the tail rack of a *KLR*. Internal compression straps secure a mesh document pouch and removable shoulder straps provide multiple carrying methods from backpack to shoulder bag. The flat, elliptical shape facilitates stacking and provides a low profile when used as a tailbag. D-rings secure external pouches for extra storage when needed. **Dimensions:** 15"L (38 cm) x 20"W (50 cm) x 9"D (22 cm) **MSRP:** \$159.99  
**WolfmanLuggage.com**

## PROS

- ✓ Flat/oval shape facilitates stacking
- ✓ External D-rings are great for adding accessories
- ✓ Internal mesh pocket is perfect for map or document storage
- ✓ Optional rain cover transforms the duffel into a waterproof car-top tote or tail bag
- ✓ Multiple strap combinations simplify carrying

## CONS

- ✗ No external pockets
- ✗ Not totally waterproof without cover
- ✗ Only one size available
